WHAT CAN YOU DO WITH YOUR DEGREE?

The College of Education prepares you to change the world by changing lives.

Students study to become teachers, therapists and scientists in a variety of fields related to improving lives through learning.

Our faculty and staff, together with local partners, current students and a vast alumni system, make up a team of people who are passionate about education and your success. As a part of the College of Education family, you will have access to a variety of personalized advising and career services.

Peers and student organizations support you on your journey, building a lasting network that continues to foster collaboration years beyond graduation.

Learn more about the community waiting for you here at the College of Education.

Professor Hirofumi Tanaka
Kinesiology and Health Education, Exercise Science
Researches vascular aging and teaches courses like Physiology of Exercise.
There’s nothing I enjoy more than watching a student grow in confidence, resilience and self-esteem, and seeing how that impacts families and entire communities.

Pam Diu
Special Education, B.S. ’13
Teacher, Hill Country Middle School, Austin

There’s nothing I enjoy more than watching a student grow in confidence, resilience and self-esteem, and seeing how that impacts families and entire communities.

Pam Diu
Special Education, B.S. ’13
Teacher, Hill Country Middle School, Austin

We are redefining the landscape of education.

of our Teacher Preparation Program graduates were immediately employed.

Renowned Faculty
Award-winning faculty and staff are dedicated to empowering you as an education leader.

Real-world Learning
Learning means doing. Our undergrads spend time in public school classrooms and labs, and get to know exactly what it means to be a teacher and educator.

Prominent Alumni
Our graduates are changing the world in schools and programs all over the country. You’ll be in high demand with a degree from UT Austin.
Huy Nguyen
Curriculum and Instruction, B.S. ’15
Teacher, Kirk Elementary School, Houston

During his last summer as a student in our Applied Learning and Development Program, Huy was involved in field work that related to two classes: Reading Assessment and Development, and Language Arts Writing Methods. Huy partnered with Anthony, a student at Galindo Elementary, and together they used innovative technologies to apply lessons about memoirs to create a graphic novel about Anthony’s life. It was a real-world experience that linked Anthony and Huy through an authentic learning partnership.

I originally got into teaching because I wanted to be in front of a class. But after taking some courses at UT, I realized that I’m changing the future. I feel like if I can empower one generation of students they will become leaders and change the world.

Top 10
School of Education

edb.utexas.edu/explore
We are at the forefront of change, both inside and outside the classroom. Undergraduates choose one of three degree pathways within the college, but we also serve students from programs across the UT campus.

Teaching certifications allow graduates from our programs and colleges like engineering or natural sciences to teach in Texas classrooms.

- Early Childhood to Sixth Grade Certification
- Bilingual Certification
- Secondary (7 – 12 grade) Certification
- All-level (pre-k-12 grade) Special Education Certification
Sarah Powell
Assistant Professor
Special Education

Sarah Powell is an award-winning faculty member and the embodiment of a dedicated educator. Her research interests include developing and testing interventions for students with mathematics difficulties, and she shares her valuable expertise with students in classes like Instructional Adaptations and Elementary Mathematics Methods.

“As a professor, I get to ask lots of questions that no one has addressed before. I love connecting the pieces and building knowledge that can be used to improve math instruction for students.”

Renowned Faculty
I feel ready to take on anything in the classroom. This program prepared me to see each student as an individual, what they bring to the classroom, and to be able to teach academic lessons that can add purpose and meaning to their lives.

Jordan Williams

It takes more than a dream to become a real leader in social justice.

Uteach Urban Teachers (UTUT) is a unique program that prepares non-Education majors for careers as English and Social Studies educators. Graduates, who earn in-depth content degrees in a variety of fields, will be equipped to thrive in the context of urban schools. UTUT is a Texas teacher certification program for grades 7 – 12 that focuses on the diverse linguistic and cultural resources students bring into the classroom.

For a complete look at program offerings and accepted majors, visit UTUT.utexas.org.
CAREER SERVICES

Advisors connect undergraduate students with potential employers by offering:

- Resume and cover letter assistance
- Job search workshops and recruiter panels
- Interview coaching and advice
- Career and internship fairs
- Opportunities to connect and interview with employers

GET INVOLVED. FIND SUPPORT.

- FIGs (First-Year Interest Groups) & TRIGs (Transfer Interest Groups) are cohorts of up to 20 first-year students who share some classes and attend weekly seminars with a peer mentor and college advisor.
- PEP (Peer Educator Program) recruits academically successful students who are knowledgeable about campus and college resources. PEP students are available to their peers to assist with the transition to UT and provide academic support.
- Student Organizations
  - Bilingual Education Student Organization (BESO)
  - Education Council (Ed Council)
  - Kappa Delta Pi (KDP)
  - Kinesiology Club (Kin Club)
  - Longhorn Athletic Training Student Association (LATSA)
  - Minorities in Education (MIE)
  - Student Council for Exceptional Children (SCEC)
  - Teachers of Tomorrow (TOT)
