**Level 1A Clinical Skills**

Please rate the student’s “overall ability” to perform the clinical skills identified in each statement using the following scale:

- **n/a** = ACI / CI has not observed the ATS performing the listed clinical skill(s)
- **0** = unable to perform the skill safely or effectively. Should not be allowed to perform the skill in the clinical setting.
- **1** = able to perform the skill safely and effectively with prompting from an ACI / CI. Should be allowed to perform the skill in the clinical setting with close supervision.
- **2** = able to perform the skill safely and effectively without prompting from an ACI / CI. Should be allowed to perform the skill in the clinical setting without close supervision.

_____ 1. Student’s ability to perform anthropometric measurement techniques and other appropriate examination and screening procedures.

_____ 2. Student’s ability to perform fitness tests, and record and interpret the data using accepted procedures and equipment.

_____ 3. Student’s ability to 1) obtain and interpret environmental data, 2) recognize potential hazardous conditions and situations in the activity setting, and 3) make the appropriate recommendations for activity.

_____ 4. Student’s ability to select and fit standard protective equipment.

_____ 5. Student’s ability to operate and instruct the use of isometric, isotonic, and isokinetic weight training equipment.

_____ 6. Student’s ability to instruct and establish a safe environment for the use of strength and conditioning equipment.

_____ 7. Student’s ability to construct custom protective devices.

_____ 8. Student’s ability to select and apply preventative and protective taping, wrapping, splinting, bracing, and rehabilitative devices.

_____ 9. Students’ ability to perform record keeping skills while maintaining patient confidentiality.

_____ 10. Student’s ability to obtain and document a clinical history for injury and illnesses.

_____ 11. Student’s ability to recognize basic signs and symptoms of common athletic injuries.

_____ 12. Student’s ability to implement an EAP.
13. Student’s ability to apply first-aid techniques while using universal precautions.

14. Student’s ability to apply immobilization devices.

15. Student’s ability to recognize and manage environmentally related injuries and illnesses.

16. Student’s ability to perform basic life-support techniques.

17. Student’s ability to use various methods of stabilization and transportation to facilitate movement or ambulation of the injured person.

18. Student’s ability to locate and utilize pharmaceutical products, storage, dispensing, and tracking information.

19. Student’s ability to activate the poison control center.

20. Student’s ability to instruct the use of and administer bronchodilators and epinephrine

21. Student’s ability to apply basic therapeutic modalities consisting of RICE, cryotherapy, thermotherapy, electrotherapy, ultrasound, and intermittent compression

22. Student’s ability to perform basic therapeutic exercises.

23. Student’s ability to obtain a person’s vital signs

24. Student’s ability to communicate effectively

25. Student’s ability to use contemporary multimedia, computer hardware, and software as related to the practice of athletic training
