Level 2B Clinical Skills

Please rate the student’s “overall” ability to perform the clinical skills identified in each statement using the following scale:

n/a = ACI / CI has not observed the ATS performing the listed clinical skill(s)

0 = unable to perform the skill safely or effectively. Should not be allowed to perform the skill in the clinical setting.

1 = able to perform the skill safely and effectively with prompting from an ACI. Should be allowed to perform the skill in the clinical setting with close supervision.

2 = able to perform the skill safely and effectively without prompting from an ACI. Should be allowed to perform the skill in the clinical setting without close supervision.

_____ Student’s ability to operate and instruct the use of isometric, isotonic, and isokinetic weight training equipment

_____ Student’s ability to instruct and demonstrate specific flexibility exercises and activities

_____ Student’s ability to perform therapeutic exercises to address the following areas (please rate each one individually):
    _____ improve ROM
    _____ improve muscular strength
    _____ improve muscular endurance
    _____ improve muscular power
    _____ improve muscular speed
    _____ improve agility
    _____ improve neuromuscular control and coordination
    _____ improve cardiorespiratory endurance
    _____ improve activity specific function and capacity

_____ Student’s ability to perform clinical evaluations of major body areas to assess and interpret for injury and illness

_____ Student’s ability to relate the findings of a clinical evaluation to determine appropriate course of treatment and rehabilitation, including the proper selection and use of therapeutic exercise protocols.

_____ Student’s ability to relate the findings of a clinical evaluation to determine appropriate course of treatment, including the proper selection and use of therapeutic modalities.

_____ Student’s ability to incorporate therapeutic modalities and therapeutic exercises in the providing care for injuries and illnesses

_____ Student’s ability to provide acute care of injuries and illnesses (i.e. first aid, emergency

Farr 10-26-04
procedures)

_____ Student’s ability to apply risk management and injury prevention techniques (i.e. obtain anthropometric and baseline information, apply protective devices, incorporate strength and conditioning techniques, identify unsafe conditions, etc.)

_____ Student’s ability to safely handle OTC medications (storage, dispensing, tracking, etc.)

_____ Student’s ability to communicate effectively

_____ Student’s ability to use computers, etc. in the athletic training room.

Please identify specific concerns or compliments in the space provided below:
